

Ta “David” Yu

Game Developer, Gameplay/Tools Programmer

Website - ta-david-yu.github.io/ | Email - ta.yu.gamedev@gmail.com

EXPERIENCE

BearBone Studio, Remote – Part-time Contract Game Programmer

July 2023 – Present

- Work on narrative indie title, Minds Beneath Us, which is planned to be released on PC and other console platforms in 2024. The game is made in Unity.
- Joined the team in the late stage of the project and took on the role of a firefighting programmer who proactively resolves bugs and optimizes performance bottlenecks.
- Enhance existing UI systems to provide controller support and to ensure that they comply with console platform certification requirements.

DYEngine (Game Engine), Remote – Solo Developer

November 2022 – Present

- Developed a 2D ECS game engine in modern C++, utilizing SDL2, OpenGL, Dear ImGui, and EnTT.
- Implemented a scene editor with support for undo/redo operations and play mode testing.
- Built a custom code generator that parses custom macro keywords to generate code for user-defined type serialisation and interface logic for the scene editor.
- Created a custom GLSL syntax parser for managing render state in shader code.
- Designed the render pipeline to support multiple windows in one game application.

Codeglue, Remote – Programming Intern

October 2021 – March 2022

- Successfully ported the Shadowrun Trilogy to all major consoles (PS4, PS5, Xbox One, Xbox Series, and Switch).
- Worked closely with designers and QA testers and successfully resolved more than 250 bugs with the extensive use of a debugger and the creation of customized tools tailored to tackle specific bugs.
- Programmed an automatic asset replacement tool in Unity that extracts assets from the AssetBundles of the original PC build to substitute them for missing/corrupt resources.
- Navigated and worked with an extensive large legacy codebase, originally created in Unity 4.0 in 2013; needed to manage three projects within a single repository with tangled logic and massive singleton classes.
- Proactively created written documentation to clearly convey issue resolutions and tool usage to both technical and non-technical team members.

Gerritory, Remote – Lead Programmer, Designer, Artist

October 2017 – October 2020

- Released on Steam and Nintendo Switch and has won several game awards since its debut.
- Led a team of 4 programmers remotely and communicated the requirements for code structure and core mechanics.
- Optimized and ported the game to Nintendo Switch. Including but not limited to draw calls reduction, improving game startup loading time and asset loading optimization.
- Implemented an in-game level editor with box selection, copy/paste, and undo/redo features using command pattern for easier level creation process. Final levels are stored in the level thumbnails using steganography.

Akatsuki Inc., Taipei, Taiwan – Game Programmer Summer Intern

August 2017

- Re-designed the tutorial for Tales of Link (a mobile title in the Tales series) using an in-house C++ game framework.
- Programmed a tweening library to animate instructions in the tutorial to improve user engagement and experience.

EDUCATION

B.A. Digital Games, Game Programming – Cologne Game Lab (CGL), TH Koeln, Germany

September 2019 – July 2023

B.S. Computer Science – National Chiao Tung University (now National Yangming Chiaotung University), Taiwan

September 2014 – June 2018, Graduated (GPA: 3.86 / 4.30)

SKILLS

Development Tools

- Unity: 6+ years experience, with console porting (Nintendo Switch, Xbox) knowledge
- Unreal: Developed a variety of short-term school projects with both Unreal C++ & Blueprint
- SDL2 (with OpenGL), FMOD, Dear ImGui, Entitas, EnTT, RenderDoc, Visual Studio, Rider, CLion, CMake, git, SQL

Programming Languages

- C++: Used to implement a custom 2D game engine for my bachelor project at CGL
- C#: Used professionally in Unity
- JavaScript + ReactJS: Made my own portfolio website
- GLSL/Unity Shader: With computer graphics knowledge

Languages

- Mandarin Chinese: Native
- English: Fluent, Professional level

RELATED AWARDS & ACHIEVEMENTS

Gerritory

- Best Design, Taipei Game Show, Indie Game Award 2019
- 2nd Place in Best Student Game, Indieplay China 2018
- Sliver in PC game genre and several other awards, Vision Get Wild 2018
- Official Selection, The MIX Indie Showcase at TGDF 2018

Other

- Academic Achievement Award, National Chiao Tung University
